TO THE TRADE

OUR BUSINESS—The Sherwood Nursery Co. are propagators and growers of ornamental trees and shrubs, specializing in the production of conifers and broad-leaved evergreens. We have put into this business the skill and experience of expert nurserymen.

SOIL AND CLIMATE—This skill and experience, coupled with a soil and climate that cannot be excelled for the growing of plants, has resulted in a product that is sure to please. Our soil is just right, free from peat, producing a fine vigorous root system, making a plant that is easy to move. Our soil and climate conditions combine in the larger plants to produce a wealth and luxuriance of foliage that cannot be surpassed in the United States. Most seasons plants can be dug and shipped from our nursery every month of the year except July and August.

QUALITY OF STOCK—The Sherwood Nursery Co. stands back of all stock sold. A constantly increasing list of satisfied customers testifies to the quality of our stock and business methods.

All stock offered in this list is our own production.

LOCATION—Our nurseries are located at Portland, Oregon, at the foot of the Cascade Mountains and almost in the shadow of Mt. Hood, where nature has made conditions favorable for plant production. Favored as we are, we can compete in price with plants grown anywhere. Furthermore, Portland is one of the leading truck and railroad centers of the Pacific coast, reached by main lines north, east, south, and west, with water grade transportation up the Columbia river eastward. Car lots can be shipped to the Atlantic coast in 10 days so that there is no danger of loss of plants.

Visitors are always welcome. If at all possible come and see our stock. It speaks for itself.

SHERWOOD NURSERY CO.

141 S. E. 65th Ave., Portland, Oregon

TERMS AND INFORMATION

TERMS:

Cash with order. Prices F. O. B. Portland.

To guarantee the reservation of stock for future delivery, one-fourth of the purchase price should accompany the order.

WRITE FOR SPECIAL PRICES AND TERMS ON CAR LOTS.

PACKING:

Boxing and packing will be charged for at cost. No charge for packing car lots.

RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in its own fields with the greatest care and packed in like manner and we make no guarantee, either expressed or implied that the stock will grow or give specific results. Upon proper proof, any stock untrue will be replaced, or any stock miscounted will be corrected. It is mutually agreed that our responsibility is limited to the original price of the stock. Complaints must be made within 5 days after receipt of stock. All shipments are at the risk of purchaser after being delivered in good condition to the carrier.

SHIPPING DIRECTIONS:

Give explicit directions stating whether stock is to be shipped by freight, parcel post or express and whether by auto or rail. In the absence of advice we use our best judgment.

NOTE:

We accept all orders upon condition that they shall be void should frost, storm or other unavoidable cause result in injury or destruction of stock.

SHERWOOD NURSERY CO.

141 S. E. 65th Ave., Portland, Oregon

TO REACH NURSERY:

Drive east on East Stark St. highway to Southeast 72nd Ave.

OR, drive east on East Burnside to Southeast 73d Ave.

Nursery is reached in a fifteen minute drive from the center of city by either one of these two main highways leading eastward.

**CYPRESS—SEE CHAMAECYPARIS OR CUPRESSUS
FIR—SEE ABIES**

JUNIPERUS (BLUE CREEPING)

Have been unable to identify this rare plant. Its color is the matchless blue of the Blue Atlas Cedar, and unchanging from season to season. The foliage is almost cypress-like in texture, somewhat resembling the Waukegan Juniper. Very hardy and does not exceed six inches in height. It undoubtedly has a great future, combining as it does delightful qualities of color, foliage, and habit of growth.

Grafted plants.....	.40	3.50	30
---------------------	-----	------	----	-------

JUNIPERUS CHINENSIS FEMINA (SYLVESTRIS) (REEVES JUNIPER)

A loosely branched tree, tips slightly nodding. Foliage bright green, completely covering the branches, in fact it is so dense that the branches appear to be moss laden. Contrast between adult and juvenile foliage is very delightful. A wonderful tree.

Grafted plants.....	.40	3.50	30
---------------------	-----	------	----	-------

JUNIPERUS CHINENSIS PFITZERIAANA (PFITZERS JUNIPER)

This well known juniper can scarcely be excelled for terrace and mass planting. Upright training gives it a very individual habit of growth and greater range of landscape uses. It is hardy and a rapid, vigorous grower and thrives under adverse conditions of soil and climate.

---	------	-------	-------	-------

JUNIPERUS COMMUNIS DEPRESSA PLUMOSA (ANDORRA JUNIPER)

One of the more recent introductions in creeping junipers. It grows close to the ground but the tips of the branches lift up not to exceed a height of eighteen inches. Its dense mat of foliage is deep green in summer, changing to a rich purpl bronze when touched by the frosts and cold weather.

18-24 inches	Three Times Transplanted.....B&B	\$.75	\$ 6.75	\$.....	\$.....

THUJA OCCIDENTALIS PYRAMIDALIS (AMERICAN PYRAMIDAL ARBORVITAE)

A most desirable arborvitae of narrow columnar growth, dense and compact without trimming. Very hardy and a favorite in almost any planting. Planted in groups it produces a most impressive alpine effect. In situations where effective hedges are desired requiring but little space, Pyramidal Arborvitae has no counterpart. The hedge becomes a solid wall of green from four to twenty feet in height and occupies no more than two feet in width. For hedges, trees should be planted one and one-half feet apart. No pruning is needed other than topping. A Pyramidal Arborvitae hedge requires scarcely any care.

ly any care.

AZALEA SHERWOODI (SHERWOOD ORCHID AZALEA)

This is a hybrid hinodegiri and our own introduction. The flowers are a fascinating and beautiful orchid in color. It has been awarded a prize in a rare plant exhibit, and has never before been offered for sale. We have been developing and trying it out for several years in our nursery where it has attracted much attention from visitors. Foliage about the size and gloss of the Hinodegiri Crimson Azalea, hardy anywhere the hinodegiri is hardy, a profuse bloomer, blooms completely covering the plant, and are large for a dwarf azalea. Flowers are a clear lavender with a speckled throat. This azalea fills a need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden.

CALLUNA VULGARIS ALBA (WHITE HEATHER)

Similar to red heather but with white blooms.				
10-12 inches Twice Transplanted.....B&B	.30	2.75	23	-----

CALLUNA VULGARIS AUREA (GOLDEN HEATHER)

Fine golden foliage taking on beautiful tinges of red during the fall and winter. Lavender flowers. A dainty, attractive plant which appeals to all who see it. Hardy. New.				
6- 8 inches Twice Transplanted.....B&B	.20	1.75	15	-----
8-10 " " " ".....B&B	.25	2.25	19	-----

CALLUNA VULGARIS HAMONDI (HAMMOND HEATHER)

Dwarf evergreen heather, attaining a height of eight inches. Foliage dark green, dainty. Flowers pink. Gem for the rockery.				
4- 6 inches Once Transplanted.....	-----	-----	10	-----

CALLUNA VULGARIS RUBRA (RED HEATHER)

The Red Heather is new and may still be considered a rare plant. When in bloom there is nothing visible but the blossoms, which are a rich, purplish-red. It is such a brilliant display of flowering beauty in mid-summer that visitors to our nursery from far and near have been amazed at its superb beauty and have been unstinted in their praise. It is hardy and grows about eighteen inches tall. As in the case of the Darley Heath and Irish Bell Heather, we cannot say too much for this matchless gem of the garden. Its blooms are especially welcome, coming at a season when there is but little competition in blossoming shrubs.

A charge of five cents a plant will be made for balling lining-out sizes.
B&B signifies balled and burlapped.

ERICA MEDITERRANEA HYBRIDA (DARLEY HEATH) (ALSO CALLED HYBRID HEATH, CHRISTMAS HEATHER OR WINTER HEATHER)

Each 10 100 1000

This is one of the most attractive and desirable plants grown in our nursery. It is hardy and dwarf, seldom reaching more than one foot in height. It has a beautiful, dense dark green foliage and from early winter to spring is covered with such a profusion of lovely, purplish blossoms that the foliage is practically obscured. It is not unusual at all to see this brave little plant blossoming through the snow. Being a winter bloomer, hardy, equally good for rockeries, borders, groups and masses, it should be included in every planting.

Upright, with slender drooping branches, handsome light green foliage, pink flowers.				
3- 4 feet.....	.35	3.25
4- 5 "45	4.00

VINES

AMPELOPSIS TRICUSPIDATA (JAPANESE CREEPER) (BOSTON IVY)				
An excellent vine for brick or stone walls.				
2 Year.....	.15	1.25	11

HEDRA HELIX VARIEGATA (VARIEGATED ENGLISH IVY)				
This ivy has all the good features of the English Ivy, being a strong vigorous grower, but it is a daintier vine, having a smaller leaf, and is brightened up by the variegated foliage so that the general effect is not heavy and somber like that of the English Ivy. Like the English Ivy it clings tenaciously to walls.				
1 Year Once Transplanted.....	4
3 " " "	8

JASMINUM NUDIFLORUM (WINTER JASMINE)				
Half shrub, half vine. Yellow flowers. Blossoms at intervals throughout the winter.				
18-24 inches Twice Transplanted.....B&B	.25	2.25	19

JASMINUM OFFICINALE (COMMON WHITE JASMINE)				
This deservedly famous southern vine is also hardy in the north. It blossoms most of the summer and late into the fall. The dainty foliage is almost evergreen. The blossoms are pure white and have an exquisite spicy fragrance. To know this beautiful vine is to prize it wherever vine effects are desired.				
3 Year Once Transplanted.....	.25	2.25	19

5 of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate.
A charge of five cents a plant will be made for balling lining-out sizes.
B&B signifies balled and burlapped.
